Anexa 4. Utilizare platforme pentru calcularea impactului activității științifice (indicii Hirsch)

Universitatea raportează, pentru fiecare cadru didactic și de cercetare titular¹ care se regăsește în lista de la Indicatorul C2.1, valorile indicilor Hirsch care se obțin utilizând platformele Google Scholar, ISI Web of Science și, respectiv, Scopus, după cum urmează:

1. Utilizarea platformei Google Scholar

Utilizarea platformei Google Scholar presupune în primul rând folosirea (sau crearea, după caz) unui adrese de email pe contul gmail, sau a unei adrese asociată Google Scholar:

- 1. Din browser (Internex Explorer, Mozilla Firefox, Chrome, etc) se accesează adresa google.scholar.ro;
- 2. În colțul din dreapta-sus se va accesa comanda **Sign in** și se vor introduce user name-ul și parola contului de gmail;
- 3. După logare, se va accesa, din partea superioară, comanda **My citations** (Figura 1) care va deschide o fereastră în care se vor completa datele personale și, obligatoriu, o adresă instituțională de email (Figura 2);
- 4. După completarea datelor personale se va genera o fereastră care va cuprinde o listă de articole;
- 5. Se va accesa comanda **Add articles**, iar din lista de articole vor trebui selectate (bifate) doar articolele care aparțin persoanei în cauză și accesată comanda **Add** (Figura 3). Trecerea la pasul următor presupune selectarea modului în care autorul dorește updatarea (automată sau prin verificare de către autor) a profilului.
- 6. După finalizarea adăugării de articole se va intra în profilul autorului unde poate fi vizualizat **indicele Hirsch** (Figura 4). Profilul autorului poate fi editat în orice moment;
 - Dacă sunt situații în care același articol apare de două sau mai multe ori, se selectează articolele în cauză și se utilizează comanda Merge (Fuzionează);
 - Se pot adăuga articole și ulterior prin accesarea comenzii Add. Tot în cadrul acestei ferestre se pot adăuga, prin accesarea comenzii Add article manually (stânga sus), articole care nu sunt identificate de către motorul de căutare. Întrucât nu au citări, aceste articole nu vor influența indicele Hirsch.
- 7. Profilul va fi făcut public prin accesarea comenzii **Make it public** (comandă aflată sub datele personale).
- 8. Din bara de opțiuni a browser-ului se va selecta opțiunea de printare ce permite atât printarea documentului cât și salvarea lui în **PDF.** Raportul cuprinzând indicele Hirsch se salvează în format **PDF** conform specificației din Anexa 2. *Standardizarea denumirii documentelor de raportare*.

¹ Se includ cadrele didactice titulare și cadrele didactice angajate cu normă întreagă, cu un contract pe perioadă determinată pe cel puțin 1 an universitar, valid în perioada de raportare.

Dates and citation counts are estimated and are determined automatically by a computer program

2. Utilizarea platformei Web of Science

Utilizarea platformei Web of Science (denumită în anii anteriori Web of Knowledge) necesită în primul rând accesarea acesteia printr-un cont de utilizator, care poate fi obținut prin intermediul platformei ANELISPLUS, conform regulilor de acces al acesteia.

Acest lucru se poate realiza prin: a) afilierea instituției la platforma AnelisPlus și asigurarea accesului la platformă în interiorul instituției, sau prin oferirea de "mobile acces" către orice alt computer; b) achiziționarea directă a accesului și c) accesarea individuală, prin intermediul unei instituții afiliate (Lista instituțiilor afiliate se regăsește la următorul link: http://www.anelisplus.ro/?page_id=68).

Se introduce în browser-ul de internet urmatoarea adresă: www.isiknowledge.com

Se realizează direcționarea către zona de lucru a platformei.

- 1. Se selectează doar criteriul Core Collection (unde se regăsesc doar citări din/ de la reviste, conferințe, cărți cotate ISI) (Figura 1)
- 2. Căutarea se face selectând **Basic Search**; (Figura 2)
- 3. Este folosit criteriul de căutare **Author** unde se introduce numele autorului și inițiala prenumelui acestuia;
 - Se verifică ca în comanda More Settings să fie bifate toate casuțele disponibile (Figura 2)
- 4. Se generează o listă de articole din care trebuiesc bifate doar cele ale autorului în cauză; (Figura 3)
- 5. Pentru o afișare cât mai utilă se sortează de la cel mai citat articol la cel mai putin citat, selectând acest lucru din bara **Sort by** și bifând **Highest to lowest**; (Figura 3)
- 6. Se accesează butonul **Add to Marked List** iar articolele bifate vor fi transferate în această listă; (Figura 3)
- 7. Se accesează zona **Marked List** pentru a se putea lucra doar cu articolele autorului respectiv alese anterior; (Figura 3)
- 8. Este accesat butonul **Creat citation report** și astfel este generat raportul de citări ale autorului respectiv; (Figura 4 si Figura 5)
- 9. Se face verificarea faptului că articolele care contribuie la indicele **Hirsch** aparțin autorului, iar în caz contrar se revine și se deselectează cele introduse eronat. (Figura 4)
- Raportul creat se salvează accesând din bara de opțiuni a browser-ului opțiunea de printare ce permite atât printarea documentului cât și salvarea lui în **format PDF**. (Figura 5) Raportul cuprinzând indicele Hirsch se salvează în format **PDF** conform specificației din Anexa 2. *Standardizarea denumirii documentelor de raportare.*

3. Utilizarea platformei Scopus

Utilizarea platformei Scopus necesită în primul rând accesarea acesteia printr-un cont de utilizator, care poate fi obținut prin intermediul platformei ANELISPLUS, conform regulilor de acces al acesteia (v. detaliile menționate pentru platforma web of Science).

În cele ce urmează vom detalia pașii pentru utilizarea eficientă a platformei Scopus:

- 1. Din browser (Internex Explorer, Mozilla Firefox, Chrome, etc) se accesează adresa scopus.com;
- 2. Din bara de sus (secundară) se selectează opțiunea **Author Search** și se completează numele autorului și inițială prenumelui în câmpurile special notate (Figura 1);
- 3. Se va genera o listă de autori care au aceeași nume și inițială ce cele introduse;
- 4. Se selectează autorul și se utilizează comanda Show Documents (aflată în bară orizontală);

- Se pot selecta *mai mulți autori* (același autor poate apărea de 2 ori: Popescu G și Popescu G. I.) și se va aplica comanda **Show Documents** (Figura 2);
- 5. Se va genera lista de articole pentru autorul (autorii selectați);
- 6. Se bifează doar articolele autorului respectiv sau se utilizează comanda **Select All** și se deselectează cele care nu aparțin autorului în cauză;
 - Articolele selectate pot fi adăugate în **My List** prin selectarea Opțiunii More (din bara verticală) și aplicarea comenzii **Add to my list** (Figura 3).
- 7. După selectarea articolelor se utilizează comanda View citation overview care va genera indicele Hirsch.
- 8. În cadrul paginii **Citation overview** se realizează o verificare a articolelor selectate anterior și dacă exista greșeli articolele acestea se vor elimina din listă prin accesarea comenzii de eliminare –X din listă:
- 9. Se accesează comanda **Print** ce permite atât printarea documentului cât și salvarea lui în **PDF** (Figura 4). Raportul cuprinzând indicele Hirsch se salvează în format **PDF** conform specificației din Anexa 2. *Standardizarea denumirii documentelor de raportare*.
